

Onyx Pro2015 Totally New

Since years of research and study, Onyx Pro has been serving our clients. Our clients' success, special experience and expertise in different countries served us as an environment of study and analysis for development and production renewable versions. You will find the following in Onyx Pro (2015):

- 1 Onyx Pro 2015 ERP software includes two sections: one for main systems that are needed by the clients such as Financial, Administrative and Reports Systems. The other section includes specialized systems that some of which are needed by the client according to his activity such as POS, MRP, Assets management or others. You can see Onyx Pro Systems list from here.
- 2 To Support the organizational administrative building in the corporation, the client can log in the financial, administrative and reports systems of Onyx Pro 2015 from one log-in window. These systems' configuration and parameters are to be set up from one place. Although each system is logged in separately, all systems are linked and integrated flexibly in terms of functions and database within Onyx Pro Software in the organization.
- 3 In version 6.0 of Onyx Pro (ERP), all the 25 modules have one main interface and can be logged in with one name and password for the user. Modules Management has been specialized for configuration and parameters management.
- 4 The use of tree divisions in the structural building of organization chart, classifying inventory items, and moving some of modules components from one place to another in order to facilitate their functions. For example, Chart of Accounts has been moved to configuration rather than GL Management Module.
- 5 The user can set his/her privacy in work environment. i.e., s/he can choose the themes, his/her favorite screens and order them as s/he likes so as to achieve quick access to any of those selected screens from any open screen and then back to the same screen.
- 6 The process of displaying the enclosed documents to accounting entries is not important for businessmen because Onyx Pro version 6.0 archives all those documents in the selected files for saving path in the defined servers for archiving within work network.
- 7 A number of new additions and features, which have been resulted of experience and study, have been developed in Onyx Pro software version 6.0 for the purpose of integrated option service in computerizing the organizational performance of business enterprises.

Onyx Pro2015 New Additions
